

Metal Markets

Kjetil Ebbesberg, Executive Vice President and Head of Metal Markets
Capital Markets Day, December 2, 2009

Integrated business strategy

Creating additional value midstream

Upstream & Energy

- Energy competence
- Bauxite, alumina and carbon
- World class primary production
- New technology
- Future growth

Midstream

- Optimize value on top of LME
- Enhance value of market system
- Remelting & recycling
- Sourcing & trading
- Operational LME risk management

Downstream

- Rolled Products and Extrusion
- Cost and market focus, margin management
- Future growth Extrusion and Building Systems

Midstream business scope

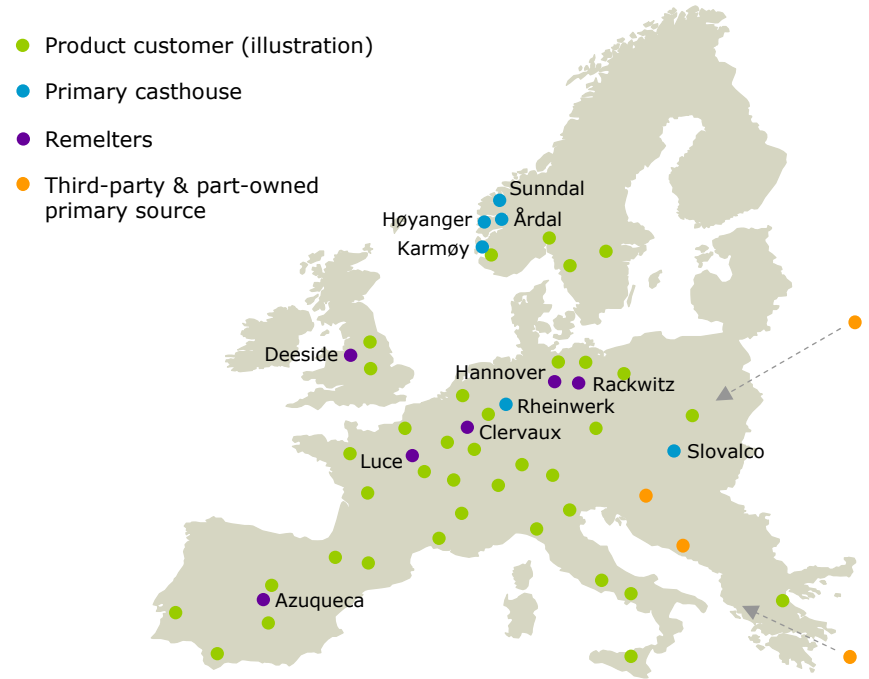

Business concept:

- Increased business volume through limited asset investments
- Optimized system costs related to sourcing, casthouse operations and marketing of metal products
- Maximize casthouse capacity utilization
- Basis for strategic alliances
- Gain leading position in scrap conversion

Supply network Europe

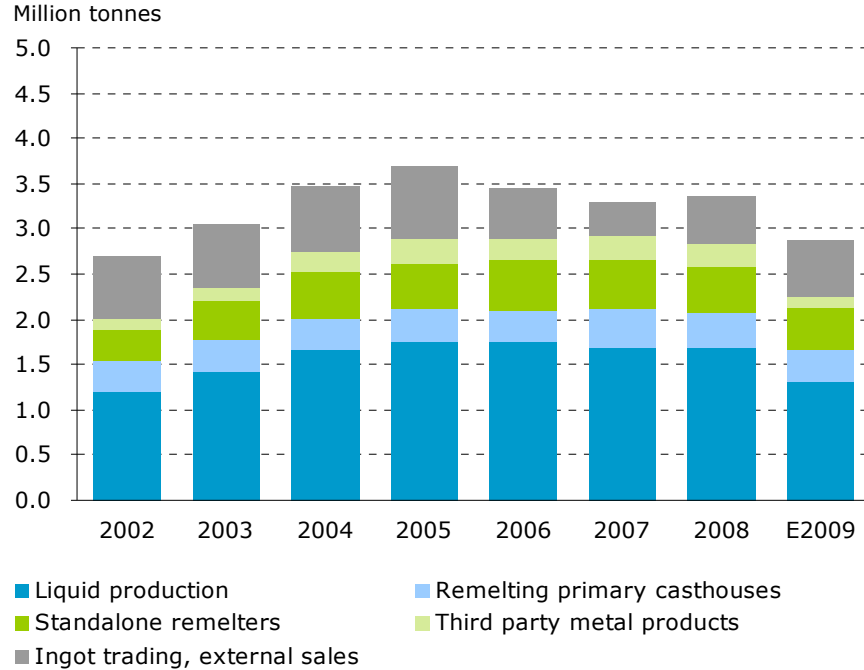

- Capacity in Europe
 - 1.1 mill tonnes of primary metal
 - 1.0 mill tonnes of remelting and recycling*
 - 0.6 mill tonnes Qatalum (100%)
 - 0.2 mill tonnes of third party metal products
- Flexible multi-sourcing system
- Stand-alone remelters close to customers
- Extracting value servicing customers and optimising logistics

* Excluding downstream capacities in Rolled Products and Extruded Products

Casthouse value added products

Leading supplier in Europe – growing in Asia and the US

Value added products (2008 global sales):

Extrusion ingot
(1 600 000 tonnes)

Foundry alloys
(350 000 tonnes)

Sheet ingot
(600 000 tonnes)

Standard ingot (2008 global sales, own production):

Standard ingot
(200 000 tonnes*)

- Standard metal
- Commodity market
- Further upgrading

*) Own production only, excluding traded third-party volumes (300 000 tonnes)

Customer value added services

1. Product mix/development

- Alloys
- Dimensions
- Specifications

2. Scrap conversion services

3. Market / LME

- Pricing services
- Customer e-portal
- Market information

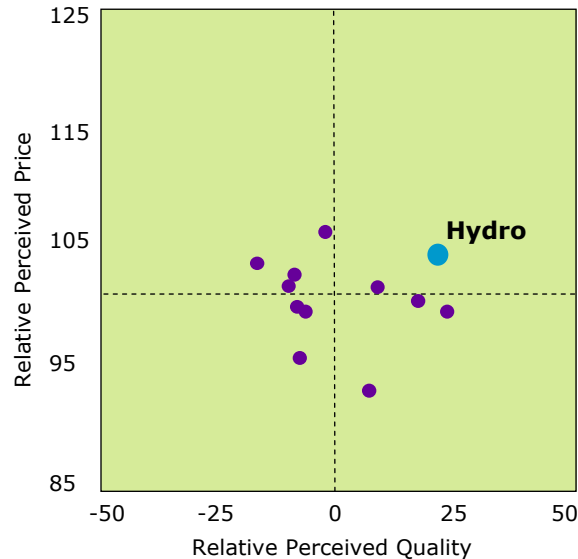

4. Technical support

- Alloys & process services
- Laboratory services

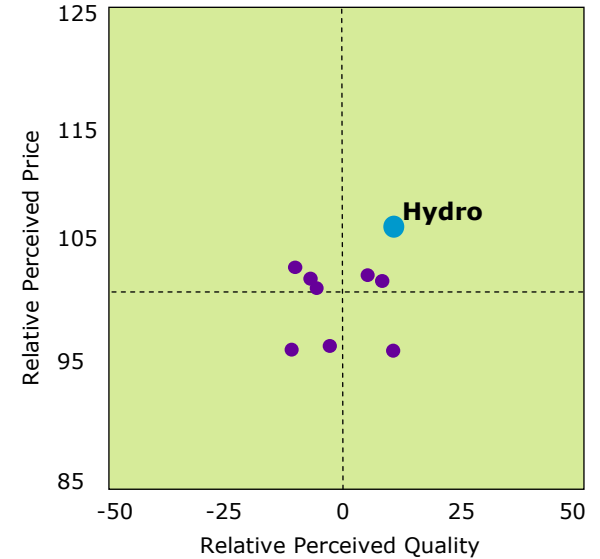

5. Loyalty program

Customer rating vs peers

Casthouse optimisation and remelting

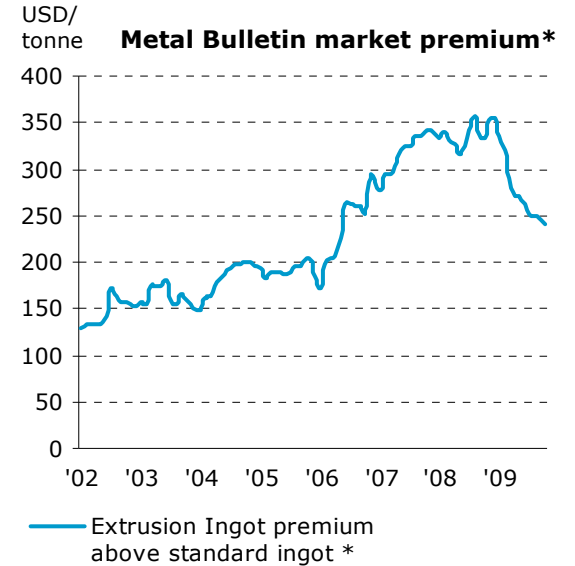

Better asset utilisation ...

... through remelting ...

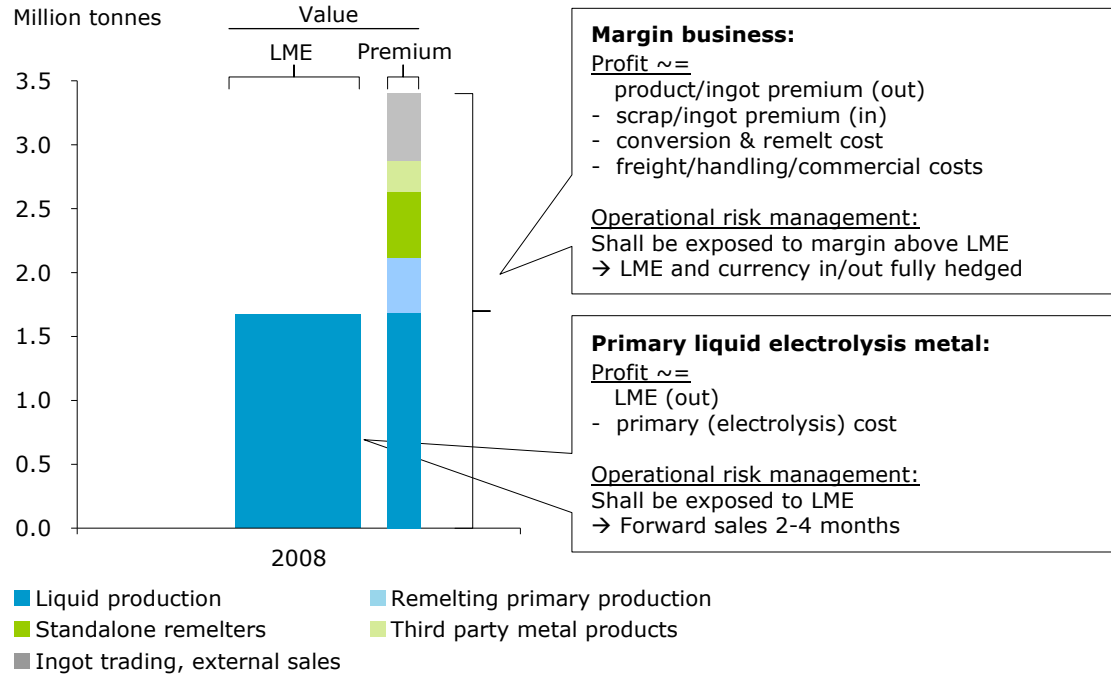

... into value added products

* Source: Metal Bulletin (Extrusion Billet Premium 6063, EC duty paid and LME HG, EC duty paid, 3 months - in warehouse Rotterdam)

Midstream margin and risk management

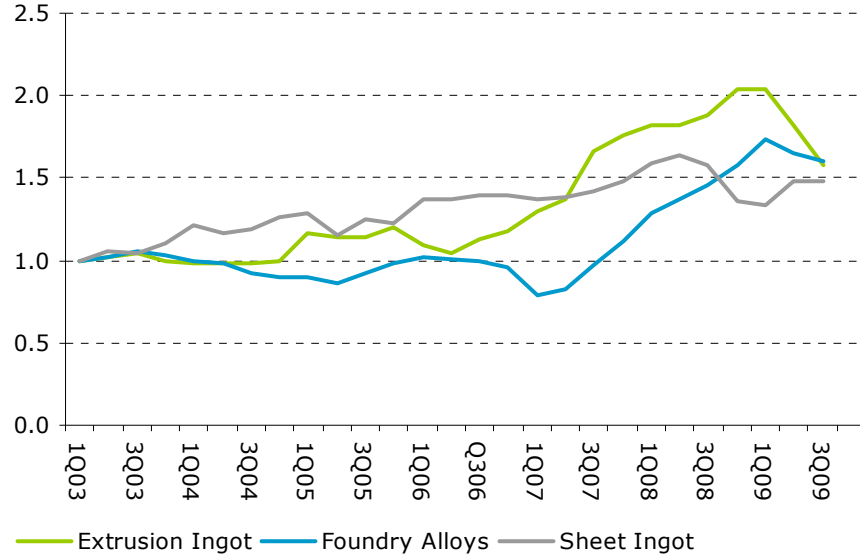

Main margin drivers:

- Volumes
- Product premiums & spreads
- Currency
- Contango
- Freight costs & logistics
- Prime/scrap rates (feedstock)
- Scrap grades & discounts
- Melt loss, net
- Energy cost
- Alloy costs
- Conversion rates
- Handling/commission fees
- Fixed costs

Product premium above ingot

Indexed

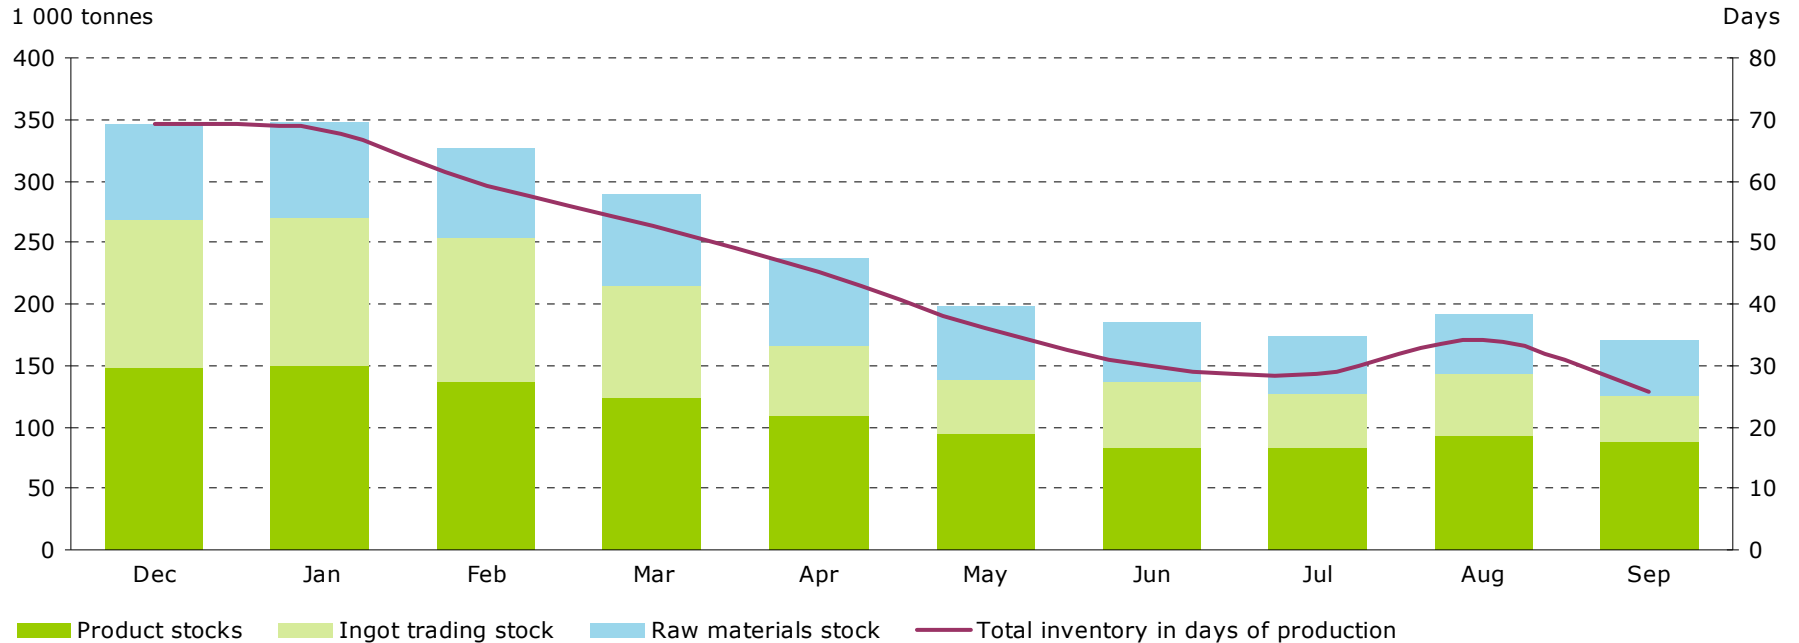

EUR/mt

Indexed

Swift inventory reduction during 2009

Metal Markets overview

Primary casthouses
(in Primary Metal)

- Sales, logistics and capacity optimization by Metal Markets on cost coverage and commission basis
- Casthouse operations and EBIT margins in Primary Metal

Remelters

- Stand-alone remelting in Europe, the US and Asia
- Full price margin remelting and scrap conversion services

Third party metal products

- Resale of 3rd party metal products and part-owned sources

Metal sourcing & trading

- Physical standard ingot portfolio management and LME paper trading

Operational hedging & risk management

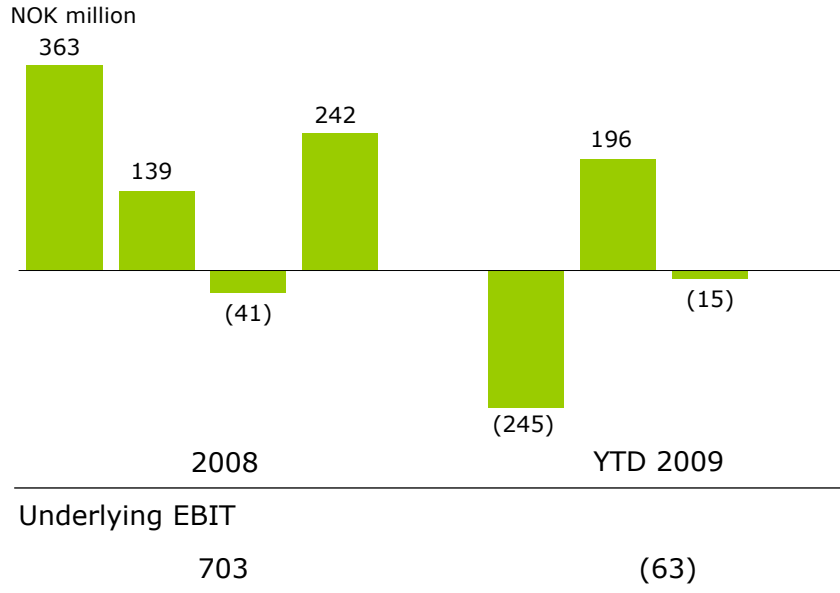

- Internal operational hedging services
- Managed on net portfolio basis versus LME

Other

- Advanced tailor-made high purity aluminium
- HyCast casthouse technology development

Financial results

- Main profit from metal sourcing & trading, remelters and resale of third party metal products
- Results in periods heavily impacted by currency and operational hedging related effects
 - Currency transaction exposures hedged internally with hedge gain/loss as financial items
 - Translation of USD denominated LME derivatives and inventories from USD to NOK (reporting currency)
- Volumes and premiums sensitive to market variations

Key messages

- Unique midstream concept and market positions
- Value added products on top of commodity liquid production
- Margin management is key
- Remelting & recycling – flexible and well aligned with future needs
